```

> Why do I have a folder named ".vercel" in my project?
The ".vercel" folder is created when you link a directory to a Vercel project.

> What does the "project.json" file contain?
The "project.json" file contains:

- The ID of the Vercel project that you linked ("projectId")
- The ID of the user or team your Vercel project is owned by ("orgId")

> Should I commit the ".vercel" folder?
No, you should not share the ".vercel" folder with anyone.
Upon creation, it will be automatically added to your ".gitignore" file.

```

> Why do I have a folder named ".vercel" in my project?
The ".vercel" folder is created when you link a directory to a Vercel project.

> What does the "project.json" file contain?
The "project.json" file contains:
- The ID of the Vercel project that you linked ("projectId")
- The ID of the user or team your Vercel project is owned by ("orgId")

> Should I commit the ".vercel" folder?
No, you should not share the ".vercel" folder with anyone.
Upon creation, it will be automatically added to your ".gitignore" file.

```

> Why do I have a folder named ".vercel" in my project?
The ".vercel" folder is created when you link a directory to a Vercel project.

> What does the "project.json" file contain?
The "project.json" file contains:
- The ID of the Vercel project that you linked ("projectId")
- The ID of the user or team your Vercel project is owned by ("orgId")

> Should I commit the ".vercel" folder?
No, you should not share the ".vercel" folder with anyone.
Upon creation, it will be automatically added to your ".gitignore" file.
